Data Notes	214

Introduction

This edition marks the seventh year that we have published *The Top American Research Universities* with tables displaying the comparative performance of these remarkable campuses on nine measures. While many rankings of colleges and universities exist, and each serves a particular audience and purpose, *The Top American Research Universities* has a point of view. For us, the publication of comparative data offers an opportunity for research campuses to place their performance in a national perspective useful for measuring improvement. In addition, we believe data derived from public sources of reasonable reliability, standardized to reflect single campus performance, presented in a clear and unambiguous way without weighting or combining data, and focused on key measurable indicators have the most utility for understanding research universities.¹

Although it is often tempting to try and to identify the best American research university in some form of ordered list that celebrates a mythical Number One, this form of institutional ranking serves primarily public relations purposes. Research universities, as we have observed in several studies published along with the data, are complex places. No two are exactly alike, and the effort to crown an annual winner in some research university sweepstakes offers little beyond publicity value. Instead, the data we have collected and published over the years clearly demonstrates that these institutions, which we have generously defined by the measure of \$20 million in annual federal research expenditures, share a number of characteristics.

Most importantly, these are highly competitive enterprises. They all—whether organized as public or private entities, or teaching many or a few undergraduates—compete for the same faculty, the same research grants, publication in the same prestigious journals and presses, the same high-quality undergraduate and graduate students, and the same academic prizes and awards. Although all these institutions are in the same marketplaces, those with the highest performance are successful in almost everything they do. As frequent readers of *The Top American Research Universities* the TARU know,

we collect data on nine measures, and the best universities excel on all nine. Others do well on some measures, but not all.²

Over the years, we have reviewed these data to understand better the mechanisms of institutional improvement. Institution composition is one of the critical elements in determining a campus's success in competing for high quality faculty, staff, and students. For example, the data do not support the common assumption that the presence of a medical school indicates a high level of research performance. Instead, only a highly productive research competitive medical school to increases the total research productivity of a campus. Many medical schools focus on preparing physicians, and contribute little to the research productivity of a campus. From another perspective, some highly productive research campuses owe much of their standing to the work of their on-campus medical schools. Other campuses, however, have both a high performing research intensive medical school and high research productivity in the other colleges and schools on the campuses.³

These distinctions help explain the futility of attempting to rank all research universities in one list. The campuses are different, the difference is significant, and the competition is often more between colleges, schools, and departments than it is between campuses. At the same time, in most research university environments, it is the campus that organizes the infrastructure, sets the priorities, and mobilizes the funds required for successful competition.

Improvement in performance requires an understanding of the organization of research university enterprises. While the often Byzantine complexities of public institution governance deserve extended treatment, the basic structure of the research campus is much less obscure and relatively standardized. In almost all research universities, the critical element for competitive success lies with the faculty organized into discipline-based departments (or in some cases schools). These discipline-based organizations function much like medieval guilds, defining the standards of their craft, specifying the criteria for entry and promotion, and guaranteeing the quality of the products delivered with the guild's mark. These guilds, individually organized and operated on each campus,

share a common set of quality criteria and disciplinary definitions with their counterparts within the same discipline on other research campuses across the nation and often around the world. The research quality of any campus depends entirely on the ability of these guilds to recruit and retain the most productive research faculty in their discipline: these guilds constitute the academic core of the research university.⁴

However, the success of the academic core depends not only on the energy, creativity, and competitiveness of the faculty, but on the effectiveness of the support provided by an administrative shell that surrounds and sustains the activities of the core. This administrative shell is responsible for driving the economic system that provides equipment, books, offices, classrooms, laboratories, and staff to the academic core. The stronger the support structure provided by the administrative shell, the higher the performance the campus can expect of its academic core. Indeed, the single element that best predicts high performance among research university campuses is the total amount of disposable income the institution has after paying for the basic cost of instruction.

Research universities, leaving aside stand-alone medical centers, do two fundamental things: teaching and research. Everything else they do is either a contribution to or a deduction from the support for teaching and research. If an activity generates surplus revenue, then it contributes to the institution's competitive success in teaching and research (for example, income from patents and licenses or private fundraising). If an activity generates a deficit, it reduces the funds available for teaching and research (for example, intercollegiate athletics for all but the very biggest and most successful programs).⁵

Governing boards, institutional constituencies, and the public often expect universities to perform many other social and political functions. These may well be essential to the mission of the institution, but unless they generate surplus revenue, they come at the expense of investments in quality teaching and research. Viewing university work in this rather stark way focuses on the competitive context and the mechanisms for success. Universities, by virtue of the high regard in which they are held and the importance the most selective of them hold in the public imagination,

are highly visible public actors. They are conscious of brands and public relations, they guard their reputations with intensity, and they advertise incessantly, although the more famous the institution the less it needs to advertise because the popular press does it for free. Less famous institutions must advertise more to enhance a reputation that may, or may not, coincide with performance.⁶

Throughout the collection of these data, these reports have focused on the research university campus. This is not without controversy. In the public sector, many multi-campus systems have emerged in an effort to consolidate political support and create a better distribution of educational opportunity throughout a state. Some smaller systems in particular are prone to present the aggregated work of their various campuses as if it came from one place. For political and other reasons, these systems speak of a multi-campus university (with its many quite different institutions) as if it were one place. *The Top American Research Universities* takes the view that the competitive power of a research university is defined by its place, its campus. In complex public systems, faculty are much more likely to collaborate between with their counterparts at campuses outside their system than they are with counterparts within the system, and in most university systems, the characteristics of the various campuses subsumed under a single corporate rubric are fundamentally different. Nonetheless, to appear more significant, university systems will often announce their comparative performance by presenting an aggregated number for all their campuses and compare it to the single campus number of other institutions. This form of deceptive advertising has its purposes, but it does not help institutions understand their comparative performance over time.⁷

We have reviewed these issues often over the past six or seven years. We have had the advice and counsel of the various members of our Advisory Board, the expert staff who have worked with us, and the constant commentary and critiques of our colleagues around the country. We have presented this work in various forms in the US and abroad to many audiences. These encounters have led us to review the publication and format. The primary utility of the *Top American Research Universities* comes from the

publication of the tables in their consistent format over time. While many people have found the introductory essays of considerable interest, the core value of the publication remains the data. Because the preparation of the essays, dependent often on the latest information in the tables, delays the publication of the *Top American Research Universities*, beginning with this issue we will prepare and publish the tables as soon as the underlying data is available. This should result in a more timely publication. We will, of course, continue the publication of the tables and a variety of supporting information in downloadable Excel worksheets on the website. We will continue to produce occasional papers and essays on topics of interest, either for direct publication directly or through other journals and periodicals as appropriate.

This edition of the *Top American Research Universities* also marks a change in the organization and sponsorship of the project and publication. We are grateful to Mr. Lewis Schott, whose generous gift to the University of Florida provided the seed funding for this project and continues to sustain various elements of our work. Through 2006, the University of Florida provided support and colleagues at that institution made a major contribution to its success as reflected in each year's publication and to the existence of *TheCenter* as a research unit within that institution. Over the last several years, portions of the work that underlies the *Top American Research Universities* found support at other institutions, notably within the SUNY system and the University of Massachusetts Amherst, as well as now, at Arizona State University. Beginning in January 2007, *TheCenter* at the University of Florida will close and the institutional base of the *Top American Research Universities* will move to Arizona State University, which has generously offered significant support, and the preparation and publication of *The Top American Research Universities* will be based at ASU in collaboration with the University of Massachusetts Amherst. In addition, the University of Florida will allow continued private support from the funds provided by Mr. Schott and others for this work.

The website will move on **February 1, 2007**, and the addresses of the Co-Directors and the office will be as listed below. Throughout the years of this project, the co-directors have relied on the tireless and effective work of Ms. Lynne Collis, who has managed the activities surrounding *TheCenter* and the *Top American Research Universities* project at the University of Florida. She has been an invaluable participant in all of our work and we wish her the best in her new assignments within the University of Florida.

¹ For the initial perspective adopted for these annual reports see, The Myth of Number One: Indicators of Research University Performance, (2000). A discussion of the difficulties encountered with educational data appears in The Use of IPEDS/AAUP Faculty Data in Institutional Peer Comparisons (*TheCenter Reports*, 2001) by Denise S. Gater and John Lombardi and Using National Data in University Rankings and Comparisons (*TheCenter Reports*, June 2003) by Denise S. Gater. See also Denise S. Gater's reviews of the most profitable of all the ranking surveys are in A Review of Measures Used in U.S. News & World Report's "America's Best Colleges" (*TheCenter*, Summer 2002) and U.S. News & World Report's Methodology (*TheCenter Reports*, 2001, Revised).

² A discussion of the competitive context appears in Quality Engines: The Competitive Context for Research Universities, 2001 and The Competition for Top Undergraduates by America's Colleges and Universities (*TheCenter Reports*, 2001) by Denise S. Gater.

³ The first review of the impact of medical schools appeared in 2001 the section on "The Impact of Enrollment and Medical Schools on Research Competitiveness" in Quality Engines: The Competitive Context for Research Universities. A more detailed analysis appears in the 2005 publication, Deconstructing University Rankings: Medicine and Engineering, and Single Campus Research Competitiveness, with a demonstration of the impact of medical schools on the comparative research performance of their campuses.

⁴ We first discussed the competitive context for research universities in 2001 in "The American Research University: A Perspective" in Quality Engines: The Competitive Context for Research Universities. In the next year, 2002, we further developed the discussion of "University Organization and Governance" in University Organization, Governance, and Competitiveness.

⁵ For a discussion of the importance of funding, see the section on "Relationship of Governance to Research University Competitiveness" in University Organization, Governance, and Competitiveness, 2002. On the impact of NCAA sanctioned sports on research universities see The Sports Imperative in America's Research Universities, 2003.

⁶ On the topic of the university's societal responsibilities, see Toward Determining Societal Value Added Criteria for Research and Comprehensive Universities (*TheCenter Reports*, 2001) by Roger Kaufman.

⁷ See The Myth of Number One: Indicators of Research University Performance, 2000, and On pPublic uUniversity oOrganization and gGovernance, University Organization, Governance, and Competitiveness, 2002.

Part I – The Top American Research Universities

The Center for Measuring University Performance determines the Top American Research Universities by their rank on nine different measures: Total Research, Federal Research, Endowment Assets, Annual Giving, National Academy Members, Faculty Awards, Doctorates Granted, Postdoctoral Appointees, and SAT/ACT range. (The Source Notes section of this study provides detailed information on each of the nine indicators.) The tables group research institutions according to how many times they rank in the top 25 on each of these nine measures. The top category includes those universities that rank in the top 25 on all nine indicators. The bottom category includes universities with only one of the nine measures ranked in the top 25. Within these groups, institutions are then sorted by how many times they rank between 26 and 50 on the nine performance variables, with ties listed alphabetically. A similar methodology produces a second set of institutions—those ranked 26 through 50 on the same nine measures.

For the purpose of this study, *The Center for Measuring University Performance* includes only those institutions that had at least \$20 million in federal research expenditures in fiscal year 2004. This is the same dollar cutoff used in our last five reports.

The first two tables list each institution with the most current data available for each measure and its corresponding national rank (i.e., rank among all institutions regardless of whether they are privately or publicly controlled). The third and fourth tables provide the same nine data measures but with the groupings determined by the control rank (i.e., rank among all private or all public institutions). Institutions ranking in the top 25 on at least one measure are included in the tables with the (1-25) identifier, while those ranking 26 through 50 are found in the tables labeled with the (26-50) header.

The Top American Research Universities (1-25) identifies the 51 institutions (25 private, 26 public) that rank in the top 25 nationally on at least one of the nine measures.

The Top American Research Universities (26-50) identifies the 37 institutions (11 private, 26 public) that rank 26 through 50 nationally on at least one of the nine measures.

The Top Private Research Universities (1-25) identifies the 37 private institutions that rank in the top 25 among all private universities on at least one of the nine measures.

The Top Public Research Universities (1-25) identifies the 48 public institutions that rank in the top 25 among all public universities on at least one of the nine measures.

The Top Private and Public Research Universities (26-50) identifies the 18 private and 39 public institutions that rank 26 through 50 among their private or public counterparts on at least one of the nine measures.

Many research universities rank highly both nationally and among their public or private peers, and therefore appear in more than one table. For example, of the 37 private institutions in the Top Private Research Universities (1-25) table, 25 universities also appear in the Top American Research Universities (1-25) table.

Data found in these tables may not always match the figures published by the original source. *The Center for Measuring University Performance* makes adjustments, when necessary, to ensure that the data reflect the activity at a single campus rather than that of a multiple-campus institution or state university system. When data are missing from the original source, *The Center for Measuring University Performance* may substitute another figure, if available. A full discussion of this subject, and the various adjustments or substitutions made to the original data, is in the Data Notes section of this report.

The Center for Measuring University Performance presents these tables, along with prior years' top universities, in Microsoft Excel spreadsheets on its web site [<http://mup.asu.edu>].

Part II – The Center for Measuring University Performance – *Research Universities*

The Center for Measuring University Performance's research universities consist of academic institutions that had more than \$20 million in federal research expenditures in fiscal year 2004. In the following tables, institutions are listed alphabetically with the most current data available on each measure and their rank on each measure for each year. *The Center for Measuring University Performance* provides both the national rank (rank among all universities) and the control rank (rank within private or public universities). We include five years of data for each measure, which correspond to the same data years used in each of the five prior *The Top American Research Universities* reports. In addition to the nine performance variables presented in Part I tables, these tables also include other institutional characteristics related to student enrollment, medical schools, land grant status, ownership, research focus, and National Merit and National Achievement Scholars. The Source Notes section of this report provides detailed information on each data element. Tables in this section include the following:

Total Research Expenditures (2000-2004)

Federal Research Expenditures (2000-2004)

Research by Major Discipline (2004)

Endowment Assets (2001-2005)

Annual Giving (2001-2005)

National Academy Membership (2001-2005)

Faculty Awards (2001-2005)

Doctorates Awarded (2001-2005)

Postdoctoral Appointees (2000-2004)

SAT Scores (2000-2004) Source: The Annual Survey of Colleges of the College Board and Data Base, 2005-2006. Copyright © 2005 College Entrance Examination Board. All rights reserved.

National Merit and Achievement Scholars (2001-2005)

Change: Research presents trend data on total, federal, and non-federal research (1995 and 2004) in constant dollars.

Change: Private Support and Doctorates provides trend data on endowment assets (1996 and 2005) and annual giving (1996 and 2005) in constant dollars, and doctorates awarded (1996 and 2005).

Change: Students includes trend data on SAT/ACT ranges (1996 and 2004), National Merit and Achievement Scholars (2000 and 2005), and student headcount enrollment (1995 and 2004).

Institutional Characteristics includes state location, highest degree offered, medical school and land grant status, federal research focus (summary of federal research by discipline), and total student enrollment.

Student Characteristics provides headcount enrollment data broken out by level (i.e., undergraduate, graduate, first-professional), part-time enrollment by level, and degrees awarded.

The Center for Measuring University Performance Measures presents the number of times a university ranks in the top 25 (or 26-50) on the nine quality measures in this year's report as compared to the past four years (2002-2005 reports).

Data found in these tables may not always match the figures published by the original source. *The Center for Measuring University Performance* makes adjustments, when necessary, to ensure that the data reflect the activity at a single campus rather than that of a multiple-campus institution or state university system. When data are missing from the original source, *The Center for Measuring University Performance* may substitute another figure, if available. A full discussion of this subject, and the various adjustments or substitutions made to the original data, is in the Data Notes section of this report.

The prior years' data or ranks may differ slightly from our last report due to revised figures or estimates from the data source or institution.

The Center for Measuring University Performance's web site [<http://TheCenterforMeasuringUniversityPerformance.ufl.edu>] provides these same tables in Microsoft Excel spreadsheets for ease of analysis. In addition to the over-\$20-million group, the on-line tables contain data on all institutions reporting any federal research since 1990. web site [<http://mup.asu.edu>].

Part III – The Top 200 Institutions

The following tables list the top 200 universities and colleges on each of the nine performance measures, along with National Merit and Achievement Scholars. (The Source Notes section provides detailed information on each of the 10 data elements.) Unlike the previous tables in Parts I and II, this section includes data for all academic institutions regardless of their federal research activity level.

The Center for Measuring University Performance provides each institution's rank nationally among all universities as well as its rank by institutional control (i.e., rank among private or public peers). In cases where several institutions tie for last place, we use a different cutoff point. For National Academy members, we list all institutions with at least one National Academy member among their faculty (a total of 195 institutions). In the case of faculty awards, we limit institutions to those with at least three faculty awards (a total of 195 institutions). Tables in this section include:

2004 Total Research Expenditures

2004 Federal Research Expenditures

2005 Endowment Assets

2005 Annual Giving

2005 National Academy Membership

2005 Faculty Awards

2005 Doctorates Granted

2004 Postdoctoral Appointees

2004 SAT Scores (Source: the Annual Survey of Colleges of the College Board and Data Base, 2004-2005. Copyright © 2005 College Entrance Examination Board. All rights reserved.)

2005 National Merit and Achievement Scholars

Data found in these tables may not always match the figures published by the original source. *The Center for Measuring University Performance* makes adjustments, when necessary, to ensure that the data reflect the activity at a single campus rather than that of a multiple-campus institution or state university system. When data are missing from the original source, *The Center for Measuring University Performance* may substitute another figure if available. A full discussion of this subject, and the various adjustments or substitutions made to the original data, is in the Data Notes section of this report.

The Center for Measuring University Performance presents these tables, along with the prior years' top 200, as Microsoft Excel spreadsheets on-line at [<http://mup.asu.edu>].

TheCenter Measures

Total Research Expenditures

Federal Research Expenditures

Source: NSF/SRS Survey of R&D Expenditures at Universities and Colleges, FY 2004.

Each year, the National Science Foundation (NSF) collects data from hundreds of academic institutions on expenditures for research and development in science and engineering fields and classifies them by source of funds (e.g., federal government, state and local government, industry, etc.). These data are the primary source of information on academic research and development (R&D) expenditures in the United States. Included in this survey are all activities specifically organized to produce research outcomes that are separately budgeted and accounted for. This “organized research” may be funded by an external agency or organization (“sponsored research”) or by a separately budgeted organizational unit within the institution (“university research”). This report excludes activities sponsored by external agencies that involve instruction, training (except training in research techniques, which is considered organized research), and health service, community service or extension service projects.

All Federally Funded Research Labs (FFRLs) are excluded from these academic expenditures data, including the following: Jet Propulsion Laboratory (California Institute of Technology); Los Alamos National Lab, Lawrence Livermore Lab, Lawrence Berkeley Lab (University of California); Software Engineering Institute (Carnegie Mellon); Argonne National Laboratory (University of Chicago); National Astronomy and Ionospheric Center (Cornell); Ames Laboratory (Iowa State University); Lincoln Laboratory (MIT); Plasma Physics Lab (Princeton); and Linear Accelerator Center (Stanford). The NSF data no longer classify the Applied Physics Lab (APL) at Johns Hopkins as an FFRL, but federal funds support the vast majority of research conducted there. The APL makes up nearly one-half of Johns Hopkins’ total R&D expenditures and 53 percent of its federal R&D expenditures.

While inconsistencies in reporting (known and unknown) do exist here, as in any survey of this type, problems arise mostly when one breaks out the data by source of funds. NSF expects institutions to use year-end accounting records to complete this report, and there are nationally recognized accounting guidelines for higher education institutions. However, there are also countless variations in institutional policy that determine whether the university reports a particular expenditure as coming from one source or another, or possibly not counted at all. Take federal formula funds for agriculture (e.g., Hatch-McIntire, Smith-Lever) as an example. We conducted an informal survey of the appropriate institutions in the Association of American Universities (AAU) and found that two out of eleven land grants did not include any of these federal funds in their 1997 NSF data, while others

included all or some of these monies. Because these funds make up a very small percentage of the total research expenditures in any given year, the impact on our total research rankings is slight. The agriculture formula funds will have a somewhat greater, but still small, impact on the federal research rankings. NSF notes, “An increasing number of institutions have linkages with industry and foundations via subcontracts, thus complicating the identification of funding source. In addition, institutional policy may determine whether unrestricted state support is reported as state or as institutional funds.”¹

We believe that the reporting inconsistencies in the data are relatively minor when using the total research expenditures and the federal research expenditures component. Federal and state government audits of institutional accounting make deceptive practices highly unlikely, even though these entities do not audit the NSF data directly. NSF goes to great lengths to verify the accuracy of the data, especially federal expenditure data—checking them against several other federal agencies that collect the same or similar information. In fact, all major federal agencies and their subdivisions submit data to NSF identifying research obligations to universities each year. Historically, the NSF data have tracked very closely the data reported by universities.² Further, for their National Patterns of R&D Resources series, NSF prefers to use the figures reported by the performers of the work (that is, academic institutions, industry, nonprofits) because they believe that the performers are in the best position to accurately report these expenditures.

In some sections of this report, these expenditure data are deflated to constant 1983 dollars to show real change over time. While NSF uses the Gross Domestic Price (GDP) implicit price deflator in its reports on federal trends in research, we use the Higher Education Price Index (HEPI) because of its narrower focus. Developed by Research Associates of Washington, the HEPI illustrates the effect of inflation on college and university operations.³ In contrast, the GDP implicit price deflator is based on change in the entire U.S. economy and, as noted by NSF itself, “[its] use more accurately reflects an ‘opportunity cost’ criterion [i.e., the value of R&D in terms of the amount of other goods and services that could have been spent with the same amount of money], rather than a measure of cost changes of doing research.”⁴

The research trend data always reflect the most recent published data available because NSF allows institutions to submit revised figures for up to two years. Each year, NSF reports data for the current year as well as for the previous seven years. Specifically, we use the 2004 Survey data for fiscal years (FYs) 2002-03, the 2003 Survey for FYs 1996-2001 data, and the 2002 Survey for FY 1995 data. NSF’s published nationwide totals for academic R&D expenditures will not always match the corresponding totals in this study due to NSF’s sampling procedures for smaller or non-reporting institutions. In some years, rather than

identifying the institutions individually, NSF provides one aggregate figure for all sampled institutions.

Endowment Assets

Source: NACUBO Endowment Study as reported in the Chronicle of Higher Education, endowment market value as of June 30, 2005.

Institutions report the market value of their endowment assets as of June 30 to three different sources, and they quite often use three different values. For this project, we use the National Association of College and University Business Officers (NACUBO) Endowment Study because of NACUBO's long history of reporting endowments of higher education institutions, their emphasis on using audited financial statements, and their focus on net assets (i.e., includes returns on investments and excludes investment fees and other withdrawals). NACUBO conducts its study annually and reports the results each February in the Chronicle of Higher Education.

Another source for endowment assets is the Council for Aid to Education's (CAE) annual Voluntary Support of Education (VSE) survey, cosponsored by the Council for Advancement and Support of Education (CASE) and the National Association of Independent Schools. The VSE survey is useful as a secondary resource because it provides more single-campus data than the other two sources. For those institutions that report a system-wide total to NACUBO, we often use the VSE data to calculate a campus' percentage contribution to the entire system, applying that factor to the NACUBO figure. In other cases, we may substitute the VSE figure when the institution indicates that this is a good data source.

The National Center for Education Statistics (NCES) Integrated Postsecondary Education Data System (IPEDS) Finance Survey also collects information on endowment assets, but these figures are often much lower than the two other sources and also are available much later. Although IPEDS instructions say to report endowment assets for "the institution and any of its foundations or affiliated organizations," it appears that not all institutions do so.

The fact that the NACUBO study requests net assets, while IPEDS and the VSE survey request gross assets, cannot explain the large differences found in some cases. In calling various institutions, we found it very difficult to determine exactly why the numbers vary so greatly. Oftentimes, two or more individuals at an institution independently report figures for these three reports with no clear understanding of how or why the numbers differ. An examination of the 1997 endowment figures provided by these institutions showed only one university (University of North Carolina at Chapel Hill) that submitted the same figure to each of the three organizations. We discovered no consistent pattern to explain reporting variations among the institutions. This area definitely warrants more study.

Annual Giving

Source: Council for Aid to Education's Voluntary Support of Education (VSE) Survey, FY 2005.

The Council for Aid to Education (CAE), an independent subsidiary of RAND, has produced the Voluntary Support of Education (VSE) Survey since 1986. The annual giving data include all contributions actually received during the institution's fiscal year in the form of cash, securities, company products, and other property from alumni, non-alumni individuals, corporations, foundations, religious organizations, and other groups. Not included in the totals are public funds, earnings on investments held by the institution, and unfulfilled pledges.

CAE's VSE Data Miner service, available on-line, provides 10 years of data for all participating institutions (more than 1,600 universities and colleges). Although this is a subscription-based service and requires a user ID and password, limited access is available on-line at [<http://www.cae.org/vse>].

National Academy Members

Source: National Academy of Sciences, National Academy of Engineering, and Institute of Medicine membership directories for 2005.

One of the highest honors that academic faculty can receive is membership in the National Academy of Sciences (NAS), the National Academy of Engineering (NAE), or the Institute of Medicine (IOM). All three are private, nonprofit organizations and serve as advisors to the federal government on science, technology, and medicine. Nominated and voted on by active members, newly elected members of these organizations receive life terms. Individuals elected to membership come from all sectors—academia, industry, government, and not-for-profit agencies or organizations. Member election dates are in February (NAE), April (NAS), and October (IOM).

The data collected for these rankings use active or emeritus members at their affiliated work institution, as reported in the on-line membership directories. In all cases, we were able to determine the specific campus for individual members. We re-check institutional affiliation annually to account for established members who have changed employers or whose membership is no longer active.

Faculty Awards in the Arts, Humanities, Science, Engineering, and Health

Source: Directories or web-based listings for multiple agencies or organizations.

For this category, we collect data from several prominent grant and fellowship programs in the arts, humanities, science, engineering, and health fields. Included in this measure are:

- American Council of Learned Societies (ACLS) Fellows, 2004-05

- Beckman Young Investigators, 2005
- Burroughs Wellcome Fund Career Awards, 2005
- Cottrell Scholars, 2005
- Fulbright American Scholars, 2005-06
- Getty Scholars in Residence, 2005-06
- Guggenheim Fellows, 200
- Howard Hughes Medical Institute Investigators, 2005
- Lasker Medical Research Awards, 2005
- MacArthur Foundation Fellows, 2005
- Andrew W. Mellon Foundation Distinguished Achievement Awards, 2005
- National Endowment for the Humanities (NEH) Fellows, 2006
- National Humanities Center Fellows, 2005-06
- National Institutes of Health (NIH) MERIT (R37) FY 2005
- National Medal of Science and National Medal of Technology, 2004
- NSF CAREER awards (excluding those who are also PECASE winners), 2005
- Newberry Library Long-term Fellows, 2005-06
- Pew Scholars in Biomedicine, 2005
- Presidential Early Career Awards for Scientists and Engineers (PECASE), 2005
- Robert Wood Johnson Policy Fellows, 2005-06
- Searle Scholars, 2005
- Sloan Research Fellows, 2005
- US Secretary of Agriculture Honor Awards, 2005
- Woodrow Wilson Fellows, 2005-06

While the vast majority of these programs clearly identify a particular campus, in a few instances we used the institution's web-based phone directory to determine the correct campus.

Doctorates Awarded

Source: NCES IPEDS Completions Survey, doctoral degrees awarded between July 1, 2004, and June 30, 2005.

Each year, universities report their degrees awarded to the NCES in the IPEDS Completions Survey. IPEDS provides straightforward instructions for reporting doctoral degrees awarded, and we do not find any inconsistencies in reporting among the universities included in our rankings. IPEDS asks each institution to identify the number of Doctor of Education, Doctor of Juridical Science, Doctor of Public Health, and Doctor of

Philosophy degrees awarded between July 1 and June 30.

Most institutions in our study submit degree data by campus or offer doctoral degrees solely or primarily at the main campus.

In addition to doctorate degrees, *The Center* presents degrees awarded at other levels—associate's, bachelor's, master's, and professional degrees—in the Student Characteristics table (see Data Tables, pp. 142-149).

Postdoctoral Appointees

Source: NSF/Division of Science Resource Statistics (SRS) Survey of Graduate Students and Postdoctorates in Science and Engineering, Fall 2004.

Each year, NSF and NIH collect data from all institutions offering graduate programs in any science, engineering, or health field. The Survey of Graduate Students and Postdoctorates in Science and Engineering (also called the Graduate Student Survey or GSS) reflects graduate enrollment and postdoctoral employment at the beginning of the academic year. Postdoctorates are defined in the GSS as “individuals with science and engineering PhD's, MD's, DDS's or DVM's and foreign degrees equivalent to U.S. doctorates who devote their primary effort to their own research training through research activities or study in the department under temporary appointments carrying no academic rank.” The definition excludes clinical fellows and those in medical residency training programs unless the primary purpose of their appointment is for research training under a senior mentor.

In the methodological notes for this survey,⁵ NSF indicates that it verifies the data with the institutional coordinator when dramatic year-to-year fluctuations are noted. In addition, in this data set, it is unclear whether an institution has actually reported zero postdocs or NSF has simply assigned a zero for non-response (rather than imputing by using prior-year or peer data, as described in NSF methodological notes). This year, in cases where we suspect it is not a true zero, we left the field blank.

Although each doctorate-granting campus submits data separately, NSF often aggregates them in its published reports. In all cases, we obtain the single-campus data for these schools directly from NSF.

SAT Scores

Source: the Annual Survey of Colleges of the College Board and Data Base, 2005-2006. Copyright © 2005 College Entrance Examination Board. All rights reserved.

The College Board reports the 25th and 75th percentiles for verbal and quantitative SAT I scores for most institutions in our study. The institutions submit these data to The College Board each spring through its Annual Survey of Colleges. For our measure, we calculated the median of that range. Some institutions report the ACT instead of the SAT to The College Board. In those

cases, we use a conversion table provided by The College Board to generate a comparable SAT equivalent score.⁶ When an institution submits neither an SAT nor ACT score, we substitute data from the prior year reported.

Other Measures of Undergraduate Quality

National Merit and Achievement Scholars

Source: The 2004-05 National Merit Scholarship Corporation Annual Report, which reflects the 2005 freshman class.

The National Merit Scholarship Corporation (NMSC) is an independent, nonprofit organization that awards scholarships to the nation's outstanding high school seniors based on their academic achievement, qualifying test scores, high school principal and counselor recommendations, and their activities, interests, and goals. The NMSC names approximately 16,000 National Merit Finalists each February. Of these, about one-half will receive a National Merit \$2,500 Scholarship, a corporate-sponsored scholarship, or a college-sponsored scholarship.

National Achievement Scholars are selected and funded in a similar fashion and represent the nation's outstanding African-American students. Ideally, the National Hispanic Scholars Program should also be included in this category, but it does not track the enrollment of its scholarship winners. Should it do so in the future, we will include these students in TheCenter's data. In this study, Merit and Achievement scholarships are credited to the main campus if the NMSC Annual Report does not indicate a branch campus.

While the number of National Merit and National Achievement award winners in the entering class provides an indication of the attractiveness of a university's undergraduate program to outstanding students, it is also an indicator that is sensitive to institutional policies on financial aid. Because the number of Merit Scholars is small, relatively small changes in institutional aid policies can have a significant impact on the number of National Merit Scholars enrolling in institutions. The average SAT score provides a broader-based and more reliable measure of overall undergraduate quality; for those reasons, we prefer the SAT scores to the number of National Merit and Achievement Scholars as an indicator of undergraduate quality.

Institutional Characteristics

Medical Schools

Source: NCES IPEDS Completions Survey, MD degrees awarded between July 1, 2004, and June 30, 2005.

Although the IPEDS Institutional Characteristics Survey does have a "medical" field that indicates whether an institution grants a medical degree, we choose not to use its data because it includes medical degrees in Veterinary Medicine, Dentistry, and other professional health-related fields. For our measure, we determined whether a particular campus awarded any MD degrees during the

academic year. If the institution did not submit any data to IPEDS for that year, we then looked at whether it was accredited by the American Medical Association to determine whether the institution has a medical school.

Land Grant Institutions

Source: National Association of State Universities and Land Grant Colleges.

The first Morrill Act in 1862 appropriated federal funds for universities to provide agricultural and technical education to their citizens. A second Morrill Act in 1890 expanded eligibility to include several historically black colleges and universities, and in 1994 several Native American tribal colleges were recognized as land grant institutions. Today, there is at least one land grant institution in each state and U.S. territory and in the District of Columbia. Of the 105 institutions, most are public universities. Federal land grant institutions receive both federal and state dollars in support of their agricultural and extension activities.

While land grant status technically applies to some university systems, such as the University of California and the University of Nebraska, for our study we designate as land grant institutions only those schools that actually perform that function (e.g., UC-Berkeley, UC-Davis, UC-Riverside, Nebraska-Lincoln). In these cases, the land grant field will identify whether an institution is part of a system-wide land grant and whether the vast majority of the activity occurs on that campus. For example, UC-Davis is coded as "Yes-System" while UCLA is coded as "No-System." We consider the 1890 institutions as land grant institutions, but we identify them separately because they do not perform extension activities.

Research Focus

NSF/SRS Survey of R&D Expenditures at Universities and Colleges, FY 2004.

In addition to reporting expenditure data by source of funds, NSF identifies in what major disciplines the money is expended. In the Research by Discipline table (Data Tables, pp. XXX), we provide the proportion of total and federal expenditures in each discipline for those institutions with more than \$20 million in federal research. These data are useful for developing groups of similar institutions for peer analysis.

The Institutional Characteristics table (Data Tables, pp. 134-141) provides a summary measure of an institution's research strength and concentration based on these discipline-level expenditures. Universities with 95-100% of their federal research dollars spent in one particular discipline are coded as "all." We identify institutions with 75-94% in one area as "heavy" and label those with 50-74% of their expenditures concentrated as "strong." Other universities with 25-49% in one or more disciplines we describe as "moderate." A few institutions (but none in the more

than \$20 million group) have expenditures distributed fairly evenly across the disciplines; those we code as “mixed.”

In some cases, where an institution reports as a multi-campus entity, we made adjustments to break out the discipline-level expenditure data by single campus. Typically, this involved moving all or a portion of the life sciences expenditures to the health or medical center campus. IPEDS fall enrollment and graduate degrees by discipline data also were used to help in this effort.

While these data offer some insight as to the research structure of a university, their usefulness is limited. For example, we may be tempted to use the life sciences as a surrogate for medical research, but we must remember that they also include agricultural and biological sciences. Further, the growing trend toward multi-disciplinary and interdisciplinary projects may make it more difficult for universities to accurately reflect expenditures by discipline or sub-discipline. TheCenter chooses not to break out these sub-disciplines because the data are increasingly prone to error as further adjustments are made.

Student Characteristics

Fall Enrollment

Source: NCES IPEDS Fall Enrollment Survey, 2004.

Each November, institutions report their current fall headcount enrollment to the IPEDS Fall Enrollment Survey. Enrollment figures include both degree seeking and non-degree seeking students. TheCenter provides the headcount enrollment by level as presented by IPEDS, along with the percentage of those attending

part-time. Graduate students include those seeking specialist degrees in engineering and education. First professional students include those seeking degrees in medical fields, such as Chiropractic, Dentistry, Medicine, Optometry, Osteopathic Medicine, Pharmacy, Podiatry, and Veterinary Medicine, as well as those seeking degrees in Law and Theology.

Each campus in our study submits enrollment data by campus, except for the few institutions identified in our Data Notes section. Because this is an informational item and not one of TheCenter’s nine quality measures, we did not attempt to adjust these figures.

2005 Annual Giving (CAE VSE Survey)	53,231	10,646	Estimate 20% is Health Center per institution.

The Top American Research Universities

Data Notes for Universities with Over \$20 Million in Federal Research			
University / Statistics	Original Data (dollars in thousands)	<i>TheCenter</i> Data (dollars in thousands)	Comments
University of Connecticut - Storrs			
2004 Total Research Expenditures (NSF)	211,236	97,169	Estimate 46% is Storrs per institution.
2004 Federal Research Expenditures (NSF)	127,609	61,252	Estimate 48% is Storrs per institution.
2005 Endowment Assets (NACUBO)	261,726	175,356	Estimate 67% is Storrs per institution.
2005 Annual Giving (CAE VSE Survey)	53,231	42,585	Estimate 80% is Storrs per institution.
2004 SAT Score (The College Board)	Not Reported	540-630;550-650	Substituted IPEDS data.
University of Hawaii - Manoa			
2005 Endowment Assets (NACUBO)	186,982	175,763	Estimate 94% is Manoa per institution.
2005 Annual Giving (CAE VSE Survey)	31,019	24,815	Estimate 80% is Manoa per institution.
University of Houston - University Park			
2005 Endowment Assets (NACUBO)	420,027	323,421	Estimate 77% is University Park per institution.
2005 Annual Giving (CAE VSE Survey)	47,379	35,061	Estimate 74% is University Park per institution.
University of Illinois - Chicago			
2005 Endowment Assets (NACUBO)	1,147,517	149,177	Estimate 13% is Chicago per institution.
2005 Annual Giving (CAE VSE Survey)	174,579	40,153	Estimate 23% is Chicago per institution.
University of Illinois - Urbana-Champaign			
2005 Endowment Assets (NACUBO)	1,147,517	791,787	Estimate 69% is Urbana-Champaign per institution.
2005 Annual Giving (CAE VSE Survey)	174,579	125,697	Estimate 72% is Urbana-Champaign per institution.
University of Kansas - Lawrence			
2004 Total Research Expenditures (NSF)	181,192	110,890	Estimate 61.2% is Lawrence per institution.
2004 Federal Research Expenditures (NSF)	101,920	59,521	Estimate 58.4% is Lawrence per institution.
2005 Endowment Assets (NACUBO)	954,943	744,856	Estimate 78% is Lawrence per institution.
2005 Annual Giving (CAE VSE Survey)	111,414	88,017	Estimate 79% is Lawrence per institution.
University of Kansas Medical Center			
2004 Total Research Expenditures (NSF)	181,192	70,302	Estimate 38.8% is Medical Center per institution.
2004 Federal Research Expenditures (NSF)	101,920	42,399	Estimate 41.6% is Medical Center per institution.
2005 Endowment Assets (NACUBO)	954,943	200,538	Estimate 21% is Medical Center per institution.
2005 Annual Giving (CAE VSE Survey)	111,414	22,283	Estimate 20% is Medical Center per institution.
University of Maryland - Baltimore			
2005 Endowment Assets (NACUBO)		135,944	Substituted FY 05 VSE data.
University of Maryland - Baltimore County			
2005 Endowment Assets (NACUBO)		13,594	Substituted FY 05 VSE data.
2004 SAT Score (The College Board)	Not Reported	540-650;570-670	Substituted IPEDS data.
University of Maryland - College Park			
2005 Endowment Assets (NACUBO)		290,013	Substituted FY 05 VSE data.
University of Massachusetts - Amherst			
2005 Endowment Assets (NACUBO)	222,631	91,279	Estimate 41% is Amherst per institution.

The Top American Research Universities

Data Notes for Universities with Over \$20 Million in Federal Research			
University / Statistics	Original Data (dollars in thousands)	<i>TheCenter</i> Data (dollars in thousands)	Comments
University of Massachusetts Medical Sch - Worcester			
2005 Endowment Assets (NACUBO)	222,631	42,300	Estimate 19% is Worcester per institution.
University of Michigan - Ann Arbor			
2004 Total Research Expenditures (NSF)	769,126	769,126	Estimate at least 97% is main campus per institution, all dollars credited to Ann Arbor.
2004 Federal Research Expenditures (NSF)	521,339	521,339	Estimate at least 97% is main campus per institution, all dollars credited to Ann Arbor.
2005 Annual Giving (CAE VSE Survey)	251,353	251,353	Estimate at least 97% is main campus per institution, all dollars credited to Ann Arbor.
University of Minnesota - Twin Cities			
2004 Total Research Expenditures (NSF)	515,061	515,061	Estimate at least 97% is main campus per institution, all dollars credited to Twin Cities.
2004 Federal Research Expenditures (NSF)	308,369	308,369	Estimate at least 97% is main campus per institution, all dollars credited to Twin Cities.
2005 Annual Giving (CAE VSE Survey)	265,499	265,499	Estimate at least 97% is main campus per institution, all dollars credited to Twin Cities.
University of Mississippi - Oxford			
2004 Total Research Expenditures (NSF)	79,867	46,642	Estimate 58.4% is Oxford per institution.
2004 Federal Research Expenditures (NSF)	59,787	39,041	Estimate 65.3% is Oxford per institution.
2005 Endowment Assets (NACUBO)	397,877	334,615	Estimate 84.1% is Oxford per institution.
2005 Annual Giving (CAE VSE Survey)	52,069	42,072	Estimate 80.8% is Oxford per institution.
University of Mississippi Medical Center			
2004 Total Research Expenditures (NSF)	79,867	33,225	Estimate 41.6% is Medical Center per institution.
2004 Federal Research Expenditures (NSF)	59,787	20,746	Estimate 34.7% is Medical Center per institution.
2005 Endowment Assets (NACUBO)	397,877	63,262	Estimate 15.9% is Medical Center per institution.
2005 Annual Giving (CAE VSE Survey)	52,069	9,997	Estimate 19.2% is Medical Center per institution.
University of Missouri - Columbia			
2005 Endowment Assets (NACUBO)	848,612	573,662	Estimate 67.6% is Columbia per institution.
University of Missouri - Rolla			
2005 Endowment Assets (NACUBO)	848,612	99,288	Estimate 11.7% is Rolla per institution.
University of Nebraska - Lincoln			
2004 Total Research Expenditures (NSF)	192,846	192,846	Single institution data reported in 2004 NSF survey.
2004 Federal Research Expenditures (NSF)	66,933	66,933	Single institution data reported in 2004 NSF survey.
2005 Endowment Assets (NACUBO)	1,042,290	677,489	Estimate 65% is Lincoln per institution.
2005 Annual Giving (CAE VSE Survey)	97,580	53,669	Estimate 55% is Lincoln per institution.
University of Nebraska Medical Center			
2004 Total Research Expenditures (NSF)	98,736	98,736	Single institution data reported in 2004 NSF survey.
2004 Federal Research Expenditures (NSF)	44,449	44,449	Single institution data reported in 2004 NSF survey.
2005 Endowment Assets (NACUBO)	1,042,290	156,344	Estimate 15% is Medical Center per institution.
2005 Annual Giving (CAE VSE Survey)	97,580	29,274	Estimate 30% is Medical Center per institution.

The Top American Research Universities

Data Notes for Universities with Over \$20 Million in Federal Research			
University / Statistics	Original Data (dollars in thousands)	<i>TheCenter</i> Data (dollars in thousands)	Comments
University of New Hampshire - Durham			
2004 Total Research Expenditures (NSF)	103,935	103,935	Estimate at least 97% is main campus per institution, all dollars credited to Durham.
2004 Federal Research Expenditures (NSF)	67,917	67,917	Estimate at least 97% is main campus per institution, all dollars credited to Durham.
2005 Endowment Assets (NACUBO)	203,062	182,756	Estimate 90% is Durham per institution.
2005 Annual Giving (CAE VSE Survey)	13,363	13,363	Estimate at least 97% is main campus per institution, all dollars credited to Durham.
University of New Mexico - Albuquerque			
2005 Endowment Assets (NACUBO)	245,234	245,234	Estimate at least 97% is main campus per institution, all dollars credited to Albuquerque.
2005 Annual Giving (CAE VSE Survey)	40,082	40,082	Estimate at least 97% is main campus per institution, all dollars credited to Albuquerque.
University of Oklahoma - Norman			
2004 Total Research Expenditures (NSF)	158,578	96,733	Estimate 61% is Norman per institution.
2004 Federal Research Expenditures (NSF)	81,048	38,903	Estimate 48% is Norman per institution.
2005 Endowment Assets (NACUBO)	777,514	536,485	Estimate 69% is Norman per institution.
2005 Annual Giving (CAE VSE Survey)	115,325	92,260	Estimate 80% is Norman per institution.
University of Oklahoma Health Sciences Center			
2004 Total Research Expenditures (NSF)	158,578	61,845	Estimate 39% is Health Sciences Center per institution.
2004 Federal Research Expenditures (NSF)	81,048	42,145	Estimate 52% is Health Sciences Center per institution.
2005 Endowment Assets (NACUBO)	777,514	241,029	Estimate 31% is Health Sciences Center per institution.
2005 Annual Giving (CAE VSE Survey)	115,325	23,065	Estimate 20% is Health Sciences Center per institution.
University of Pittsburgh - Pittsburgh			
2004 Total Research Expenditures (NSF)	461,693	461,693	Estimate at least 97% is main campus per institution, all dollars credited to Main Campus.
2004 Federal Research Expenditures (NSF)	394,444	394,444	Estimate at least 97% is main campus per institution, all dollars credited to Main Campus.
2005 Endowment Assets (NACUBO)	1,529,884	1,529,884	Estimate at least 97% is main campus per institution, all dollars credited to Main Campus.
2005 Annual Giving (CAE VSE Survey)	98,882	98,882	Estimate at least 97% is main campus per institution, all dollars credited to Main Campus.
2004 SAT Score (The College Board)	Not Reported	560-660;580-670	Substituted IPEDS data.
University of Rochester			
2004 SAT Score (The College Board)	Not Reported	600-700;630-710	Substituted IPEDS data.
University of South Carolina - Columbia			
2004 Total Research Expenditures (NSF)	121,671	121,671	Estimate at least 97% is main campus per institution, all dollars credited to Columbia.
2004 Federal Research Expenditures (NSF)	71,856	71,856	Estimate at least 97% is main campus per institution, all dollars credited to Columbia.
2005 Endowment Assets (NACUBO)		292,562	Substituted FY 05 VSE data.
2005 Annual Giving (CAE VSE Survey)	76,962	69,265	Estimate 90% is Columbia per institution.

The Top American Research Universities

Data Notes for Universities with Over \$20 Million in Federal Research			
University / Statistics	Original Data (dollars in thousands)	<i>TheCenter</i> Data (dollars in thousands)	Comments
University of Tennessee - Knoxville			
2004 Total Research Expenditures (NSF)	228,760	228,760	Estimate at least 97% is main campus per institution, all dollars credited to Knoxville.
2004 Federal Research Expenditures (NSF)	109,357	109,357	Estimate at least 97% is main campus per institution, all dollars credited to Knoxville.
2005 Endowment Assets (NACUBO)		446,948	Substituted FY 05 VSE data.
University of Texas - Austin			
2005 Endowment Assets (NACUBO)		1,351,158	Substituted FY 05 VSE data.
University of Texas Health Science Center - Houston			
2005 Endowment Assets (NACUBO)		87,927	Substituted FY 05 VSE data.
University of Texas Health Science Ctr - San Antonio			
2005 Endowment Assets (NACUBO)		226,799	Substituted FY 05 VSE data.
University of Texas MD Anderson Cancer Center			
2005 Endowment Assets (NACUBO)		263,643	Substituted FY 05 VSE data.
University of Texas Medical Branch - Galveston			
2005 Endowment Assets (NACUBO)		295,898	Substituted FY 05 VSE data.
University of Texas SW Medical Center - Dallas			
2005 Endowment Assets (NACUBO)		724,188	Substituted FY 05 VSE data.
University of Washington - Seattle			
2004 Total Research Expenditures (NSF)	713,976	713,976	Estimate at least 97% is main campus per institution, all dollars credited to Seattle.
2004 Federal Research Expenditures (NSF)	625,218	625,218	Estimate at least 97% is main campus per institution, all dollars credited to Seattle.
2005 Endowment Assets (NACUBO)	1,489,924	1,489,924	Estimate at least 97% is main campus per institution, all dollars credited to Seattle.
2005 Annual Giving (CAE VSE Survey)	259,119	259,119	Estimate at least 97% is main campus per institution, all dollars credited to Seattle.
University of Wisconsin - Madison			
2005 Endowment Assets (NACUBO)		1,000,857	Substituted FY 05 VSE data.
Virginia Polytechnic Institute and State University			
2005 Endowment Assets (NACUBO)		328,680	Substituted FY 05 VSE data.
Washington State University - Pullman			
2004 Total Research Expenditures (NSF)	171,735	161,946	Estimate 94.3% is Pullman per institution.
2004 Federal Research Expenditures (NSF)	74,944	67,674	Estimate 90.3% is Pullman per institution.
2005 Annual Giving (CAE VSE Survey)	49,469	46,006	Estimate 93% is Pullman per institution.

The Center for Measuring University Performance Advisory Board

Arthur M. Cohen

Professor Emeritus
Division of Higher Education
Graduate School of Education and Information Studies
University of California, Los Angeles

Larry Goldstein

President, Campus Strategies
Consultant, NACUBO

Gerardo M. Gonzalez

University Dean, School of Education
Indiana University

Roger Kaufman

Professor Emeritus, Educational Psychology and Learning
Florida State University
Director, Roger Kaufman & Associates
Distinguished Research Professor
Sonora Institute of Technology

Gordon C. Winston

Orrin Sage Professor of Political Economy, Emeritus
Director, Williams Project on the Economics of
Higher Education
Williams College
